## Optimising cell culture outcomes and reproducibility

PHCbi CO<sub>2</sub> Incubators provide precise control of CO<sub>2</sub> concentrations with accurate and uniform temperature control.

During cell culturing, contamination is prevented by the germicidal Copper-Embedded stainless steel interior and optional UV lamp.

Benefit also with a time saving optional H<sub>2</sub>O<sub>2</sub> decontamination feature.

### Easier to Clean & Integrated Tray Catches

Tray catches are integral parts of the chamber, opening up more space for trays by reducing 70% of the parts to accommodate more culture containers.
