\$230	\$1,000
BIOE020-002-050-050	BIOE020-002-050-250

From
\$210

Don't bind your DNA and RNA to a silica membrane or bead anymore when you can allow it to flow through freely saving you steps and time.

EchoLUTION technology purifies nucleic acid in a single step, avoiding unnecessary interactions with organic solvents in less than 10 minutes.

Use any of BioECHO's cleanup kits to efficiently remove the following: salts, detergents, nucleotides, primers, enzymes, and organic solvents.

**10 x
faster**

**~70% fewer
handling steps**

**Reduce environmental
footprint**
